Art Unit: 3721

DETAILED ACTION

Drawings

- 1. The drawings are objected to:
 - a. as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: predetermined potential 432, see at least page 5, line 1; and
 - b. because the waveforms shown in figures 1 and 5 should be labeled with standard scientific convention to denote the axis of abscissas (of X) and the axis of ordinates (of Y). See 37 CFR 1.84.
- 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional

Art Unit: 3721

replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. A substitute specification, including the abstract, in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3721

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The preamble of each of claims 1-5 is presented as a "method", but the body of each of the claims does not appear to positively set forth any method steps. A review of the claims reveals that the "limitations" are structural in nature, that is, describing the structure of an electric nailer. The claims should be carefully reviewed and revised either to present the body of each of the claims in commonly used method terminology such as "steps" or the preamble of each of the claims should be revised so as to present the claims as apparatus claims.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3721

7. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lu (US 2003/0116601 A1).

Applicant's attention is directed to the previous Office action, paragraph 5.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lu (US 2003/0116601 A1).

Applicant's attention is directed to the previous Office action, paragraph 7.

10. Claim 5 is rejected under 35 U.S.C. 102(e) as anticipated by Lu (US 2003/0116601 A1) or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lu (US 2003/0116601 A1) in view of Tsai (US 6,364,193 B1).

Applicant's attention is directed to the previous Office action, paragraph 8.

Art Unit: 3721

Response to Arguments

11. Applicant's arguments with respect to claims 1-5 have been considered but they are not persuasive.

response to Applicant's argument that Lu recites In additional structural features and has a different function, the law of anticipation requires that a distinction be made between the invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claim(s) under consideration "read on" something disclosed in the reference, i.e., all limitations of the claim are found in the reference, or "fully met" by it. Kalman v. Kimberly-Clark Corp., 218 USPQ 781. Anticipation under 35 USC 102 is established when a single prior discloses, either expressly or under reference art principles of inherency, each and every element of a claimed invention. RCA Corp. v. Applied Digital Data Systems, Inc., 221 In this instance, the subject matter of claims 1-3 is anticipated by Lu because the Lu reference reads on the claimed structure.

Art Unit: 3721

Conclusion

inquiry concerning this communication or Any earlier 12. communications from the examiner should be directed to Stephen Gerrity. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada, may be contacted. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public information for unpublished applications is PAIR. Status available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
